

Thermo King extends SLX range to include new Multi-temperature models

Thursday, 02 July 2009

Following the overwhelming success of the market-leading SLX range, leading refrigerated transport specialist, Thermo King, has launched a full multi-temperature range based on the proven SLX concept.

The SLX Spectrum has been designed to deliver the same benefits as the SLX platform, but with greater results. These include improved fuel economy with up to 30% less fuel used than the SL Spectrum and increased green credentials with 30% less CO2 emitted.

Following the overwhelming success of the market-leading SLX range, leading refrigerated transport specialist, Thermo King, has launched a full multi-temperature range based on the proven SLX concept.

The SLX Spectrum has been designed to deliver the same benefits as the SLX platform, but with greater results. These include improved fuel economy with up to 30% less fuel used than the SL Spectrum and increased green credentials with 30% less CO2 emitted.

With whisper-quiet operation the SLX Spectrum is up to 65% quieter than its predecessor thanks to the integration of low noise components running at lower speeds. Ideally suited to operating on distribution runs in urban environments and low emission zones, the unit has been designed to increase driver comfort and also to permit use in noise-sensitive environments.

The SLX Spectrum also offers operators all the benefits of the industry's most advanced controller, the multilingual Smart Reefer 2 (SR-2,) within a multi-temp unit. This ensures that the system is easy to use and easy to read with up to three trailer compartments visible simultaneously on the same screen.

"City distribution operations run under demanding conditions. With an ever-increasing focus on quiet operation and low emissions, the SLX Spectrum provides the solution our customers have been looking for. Its ease of use and flexibility will appeal to drivers and owners alike. And with fuel savings of up to 30% versus its predecessor, considerable savings can be made," said Laurent Debias, Marketing Manager for the SLX range.
